

Elios Website – Frontend Requirements & Technical Specification

1. Purpose of This Document

This document defines the **frontend requirements, technology stack, page structure, and functional scope** for rebuilding the Elios website currently hosted on Wix. The goal is to fully replace Wix with a **custom-coded frontend** while keeping the existing Firebase backend intact.

This document is intended to be handed over to the **Antigravity development team** for implementation.

2. Project Scope

In Scope

- Rebuild the entire public-facing website frontend
- Implement login/signup UI using Firebase Authentication
- Build protected customer support pages
- Replace Wix forms with custom frontend forms
- Integrate frontend with existing Firebase backend
- Host the frontend on GitHub Pages (temporary)

Out of Scope (For Now)

- Replacing Firebase backend
 - Migrating data
 - Building a new backend server
 - ERP or SaaS platform features
-

3. Technology Stack

Frontend Core

- **React (with TypeScript)**
- **Vite** (build tool)
- **React Router** (routing)

Styling & UI

- **Tailwind CSS**
- Optional component library: **shadcn/ui**

Backend Integration (Existing)

- **Firebase Authentication**
- **Firebase Firestore**
- **Firebase Cloud Functions** (for emails & form handling)

Hosting

- **GitHub Pages** (static frontend hosting)
 - Custom domain: `eliospk.com`
-

4. High-Level Site Structure

Public Pages

- Home
- Features
- About Us
- Contact Us
- Login / Signup / Password Reset

Protected Pages (Login Required)

- Customer Support Dashboard
- Warranty Registration Form
- Complaint Submission Form

Admin Pages (Role-Based Access)

- Admin Dashboard
 - View Users
 - View Warranties
 - View Complaints
 - Update Complaint Status
-

5. Page-by-Page Requirements

5.1 Home Page

The Home page is a **single long-scrolling page** containing multiple sections.

Sections on Home Page

a) Navigation Bar (Global)

- Logo
- Links:
- Home
- Features
- Customer Support
- About Us
- Contact Us
- Login

b) Hero Banner

- Product-focused hero section
- Large visuals (ACs, smart controllers, heating solutions)
- Short marketing headline
- Call-to-action buttons:
- "Explore Features"
- "Customer Support"

c) Features Section

- Highlight key product features
- Icon or image + text blocks
- Examples:
- Smart Control
- Energy Efficiency
- Wireless Connectivity

d) Customer Support Call-To-Action

- Section encouraging users to:
- Register warranties
- Submit complaints
- Button redirects to Customer Support page

e) Manuals & Downloads

- Downloadable files section
- Items:
- User manuals
- Product brochures
- Files can be static assets

f) About Us (Short Version)

- Brief company introduction

- Link to full About Us page

g) Contact Section (Short)

- Address
- Phone number
- Email
- Link to Contact Us page

h) Footer (Global)

- Company address
 - Phone number
 - Business hours
 - Social media links
 - WhatsApp chat button
-

5.2 Features Page

- Expanded explanation of product capabilities
 - Sections with images and descriptive text
 - Focus on smart devices, automation, and reliability
-

5.3 About Us Page

- Company background
 - Mission & vision
 - Brand positioning
 - Static content
-

5.4 Contact Us Page

Public Contact Form

- Fields:
- First Name
- Last Name
- Email
- Phone
- Message

Behavior

- Submits data to Firebase Cloud Function
- Sends email to customer support

- Optional Firestore storage
-

5.5 Authentication Pages

Login

- Email + password
- Firebase Authentication

Signup

- Email + password
- Email verification triggered
- User data stored in Firestore

Password Reset

- Email-based reset via Firebase
-

5.6 Customer Support Page (Protected)

Access Rules

- Only logged-in users
- Redirect to login if unauthenticated

Features

- View registered devices & warranties
- View submitted complaints
- Submit new:
 - Warranty registration
 - Complaint

Data fetched from Firestore using logged-in user's email/UID.

5.7 Admin Panel (Protected + Role-Based)

Access Rules

- Only users with `admin` role

Features

- View list of users

- View warranty records
- View complaint records
- Update complaint status (only)

All actions enforced by Firestore Security Rules.

6. WhatsApp Integration

- Floating WhatsApp chat button
 - Redirects to official business WhatsApp number
 - Simple `wa.me` URL integration
-

7. Routing Structure

Example routes:

<code>/</code>	→ Home
<code>/features</code>	→ Features
<code>/about</code>	→ About Us
<code>/contact</code>	→ Contact Us
<code>/login</code>	→ Login
<code>/signup</code>	→ Signup
<code>/reset-password</code>	→ Password Reset
<code>/support</code>	→ Customer Support (Protected)
<code>/admin</code>	→ Admin Dashboard (Protected)

8. Security Considerations

- Frontend must never trust itself
 - All sensitive operations protected by:
 - Firebase Authentication
 - Firestore Security Rules
 - Role checks must be server-enforced
-

9. Future Considerations (Not in Scope Now)

- Backend migration from Firebase to custom server
- ERP/SaaS platform integration
- Tenant-based UI customization
- AI-powered features

10. Deliverables

- Fully functional frontend replacing Wix
- Firebase-integrated authentication and forms
- Responsive design
- Production-ready build for GitHub Pages
